Stay connected and keep your business going

2N® EasyRoute offers an active back-up connection via UMTS to your current connection (DSL, cable, Wi-Fi, V-SAT). If a primary connection failure occurs, 2N® EasyRoute will automatically route the data via UMTS and will inform you via SMS. When the connection is re-established, the data will again be routed via the primary connection.

2N presents solutions for doublesizing operators' ARPU in Barcelona

We will be present at the **2011 Mobile World Congress in Barcelona** for the fourth time, this year at stand 2G13. The theme of our stand is a comprehensible promise for all operators as well as distribution partners in this segment: **Boost your ARPU** (average revenue per user). This year, we targeted the solutions on display precisely at the radical increasing of ARPU as the most monitored parameter in each operator network. The stand will include the ARPU Boost Bar with special drinks for gaining energy. **Read more...**
