

2N[®] Helios IP - A new integrated card reader

The [2N[®] Helios IP](#), can be now equipped with a new card reader. Settings can be easily set via a web configuration interface, so that, to the customer, the card reader appears to be a fully integrated solution. As a benefit, the reader contains plenty of additional interfaces, such as inputs/outputs or additional relays and buses. In this way you can, for example, connect the 2N[®] Helios IP to a security system via the Wiegand interface on the card reader.

2N[®] SmartCOM - A new M2M product
