

2N[®] Helios IP Manager - New remote configuration and management tool

Does the setup of multiple [2N[®] Helios IP](#) installations seem slow and difficult to you? Until now it was necessary to setup each [2N[®] Helios IP](#) unit separately but we are introducing you a [2N[®] Helios IP Manager](#) that resolves this issue! It is a new tool for the remote configuration of multiple [2N[®] Helios IP](#) installations, connected to the same LAN. With this attractive and easy-to-use tool, you will never need to worry about the configuration or larger installations.
