

2N® Helios IP EYE – Having video without a videophone?

Would you like to obtain a video image during a call from the [2N® Helios IP](#) intercom, but you do not have a videophone? Then this application "2N® Helios IP EYE" is just right for you! It is a freeware POP UP application, which gives you the ability to receive video in your PC from the [2N® Helios IP](#). The video starts before answering the call, so you can visually identify all arriving persons. As a bonus, there is also the possibility of exercising control over the door lock. Do you like this application? [Download it on our webpage, section software.](#)

2N offers two new solutions for operators – GSM DID&DOD and SIM Hunting.

Do you do business with operators? Are operators in your country looking for new solutions for large corporations or government organisations? Two new solutions from 2N offer savings to customers and ARPU increases to mobile operators. With the GSM DID&DOD, the original number of the calling branch is transferred although the customer uses a GSM gateway. Do you want to find out more? [Click here.](#)

With the SIM Hunting solution, also referred to as "One number reach", an available SIM card is found in the GSM gateway when calling to a specific number. You can find out more about this solution [here.](#) Let us know and start testing tomorrow!

Release of the new version of the 2N® SIM Star Server 1.4.7

This version of [2N® SIM Star Server](#) features a number of new functionalities that make the system far easier to use. Those functions include, for example, an installation guide that will guide even an unfamiliar user through the basic system setup. Another function is the possibility of sending statistical information about SIM cards by e-mail, making it unnecessary to monitor the system, as it provides you with all of the information directly in your mailbox, for example about the used/remaining credit. Does this offer appeal to you? Do not hesitate to contact your sales partner for more information.

2N presents other innovative improvements of its lift products at the Interlift Augsburg 2011 Exhibition

Between 18 and 21 October
Stand 5046, in Hall 5

Between 18 and 21 October, we will once again attend one of the largest international exhibitions of lift products and accessories. We will be presenting innovations and solutions in remote monitoring of elevators and emergency lift communication. All products will be shown at Stand 5046, in Hall 5. We expect our participation to result in new business relations and we hope to enrich our experience by learning about new global trends in the sphere of lifts and accessories. [We will be happy to see you, arrange a meeting with us.](#)
