2N is Member of the Axis group

Introduction
"For 28 years 2N has been on the forefront of access control and telecommunications. We take care to stay on the leading edge with our products, the R&D behind them, and the way we service our customers. We are proud of our growth on global markets and are now number one in IP Intercoms."

MICHAL KRATOCHVÍL
Chief Executive Officer, 2N

"AXIS group including 2N have a common goal to contribute to a smarter and safer world. There is an increased customer demand for integrated solutions with open standards that deliver enhanced security. Together with 2N we can meet that demand."

MARTIN ANDERSEN
Vice President New Business, Axis Communications

CONNECTIVITY IN IP ENVIRONMENT

IP intercoms from 2N can be connected with a wide range of external devices thanks to open standards:

- Door lock
- LightAccess system
- Fingerprint reader
- RFID card reader
- Security system
- Android Telephone
- iPhone
- iPad
- PC
- IP camera
- VMS
- Access system
- IP telephone exchange
- IP telephone
- For information about Licence Policy visit please our website.
2N® IP Verso

Only one can be perfect

The 2N® IP Verso security intercom is configurable to your needs thanks to its modularity. It provides reliable access control and allows you to easily interface with other systems, achieving even higher site security.
IP ENVIRONMENT

2N® IP Verso
KEY FEATURES

• More than 14 different modules
• Discrete HD camera
• Voice communication in HD
• Integration with security systems

RECOMMENDED USE

Main entrance of residential complex
A residential complex with tens of apartments might present a nightmare for a visitor. Make it easy for them. An outdoor intercom 2N® IP Verso can be fitted by an intuitive and clearly arranged phonebook to reach the right tenants or a receptionist. A second module combining Bluetooth and RFID technology then makes the access simpler for the residents.

Secured office building
The 2N® IP Verso with Touch Keypad & RFID module is a smart addition to your security system. While a receptionist can vet visitors, employees can use a key fob or a PIN to enter the building. Besides, the intercom’s camera can stream into a VMS system. An integration with 3rd party systems such as Milestone or Genetec is a matter of course.

Single villa with home automation
If you have a single villa with an implemented home automation system, a luxury 2N® IP Verso with fingerprint reader will be a great solution. Secure its entrance and accomplish a seamless integration with your system. Moreover, the IP intercom allows calling to smartphones and open door to visitors remotely.

## Technical parameters

### 2N® IP Verso

### Signalling protocol

| Signalling protocol | SIP (UDP, TCP, TLS) |

### Buttons

| Button design          | White-backlit transparent buttons with replaceable nametags |
| Button count           | 1 and increments of 5 (max 146) |
| Button extenders       | Up to 30 modules, limited by power supply |
| Numeric keypad         | optional |

### Audio

| Microphone             | 1 integrated microphone |
| Amplifier              | 2 W (class D) amplifier |
| Speaker                | 2 W/8 Ω |
| Output LINE OUT        | 1 VRMS/600 Ω |
| Volume control         | Adjustable with automatic adaptive mode |
| Full duplex            | Yes (AEC) |

### Audio stream

| Protocols              | RTP/RTSP |
| Codecs                 | G.711, G.722, G.729, L16/16kHz |

### Camera

| Sensor                 | 1/3” colour CMOS |
| Video resolution       | Up to 1280 (H) × 960 (V) |
| Frame rate             | Up to 30 snapshots/s |
| Sensitivity            | 5.6 V/lux-sec (550 nm) |
| View angle             | 120° (H), 90° (V), 145° (D) |
| Infrared light         | Yes |

### Video stream

| Protocols              | RTP/RTSP/HTTP |
| Codecs                 | H.263, H.263+, H.264, MPEG-4, M-JPEG |
| IP camera function     | Yes, ONVIF v2.4 profile S compatible |

### Interface

<p>| Power supply           | 12V ± 15 % / 2 A DC or PoE |
| PoE                    | PoE 802.3af (Class 0-12.95 W) |
| LAN                    | 10/100BASE-TX s Auto-MDIX, RJ-45 |
| Recommended cabling    | Cat-5e or higher |
| Supported protocols    | SIP2.0, DHCP opt. 66, SMTP, 802.1x, RTSP, RTP, TFTP, HTTP, HTTPS, Syslog, ONVIF |
| Passive switch         | NO/NC contact, up to 30 V/1 A AC/DC |
| Active switch output   | 8 up to 12 V DC depending on power supply (PoE: 10 V; adaptor: power supply voltage minus 2 V), max 400 mA |</p>

2N® IP Force

A door guard for extreme conditions

2N® IP Force is an extremely durable IP intercom that can withstand even the most demanding conditions. It provides an ability for visitor communication monitoring and access control. Take advantage of its superior features for maximum site security.
IP ENVIRONMENT

2N® IP Force
RECOMMENDED USE

School door communication
Schools are not only there to impart knowledge to our children but also to keep the children safe. With this in mind, 2N offers a door intercom that not only secures the school entrance, but allows communication with visitors.

Security in detention centres
All communication and surveillance systems in detention centres must be both highly reliable, durable and guarantee a maximum protection and security for wardens as well as prisoners. 2N® IP Force as the toughest intercom meets all these requirements.

Parking communication
Do you want to avoid queues when people cannot enter or leave the parking place? 2N parking communication solution allows you to communicate easily from the parking lot or payment machine to the assistance center. You will gain a competitive advantage and provide your customers with the option to ask for advice at the touch of a button.

KEY FEATURES

• Built for extreme conditions
• Professional night vision
• Clear sound in noisy environments
• Durable access control solution

FLUSH-MOUNTED WITH BOX
2N® IP Solo

Makes the entrance part of any Smart Home

A compact IP intercom that would be a great addition to your smart home entrance. Despite that it has only one fitted button, it can astonish by hidden HD camera, multiple functionalities including calls to your smartphone, and easy integration into the existing home automation system.
IP ENVIRONMENT

2N® IP Solo
KEY FEATURES

- Entrance to your Smart Home
- Sharp video day and night
- Integration with Home Automation
- Tailored for residential market

RECOMMENDED USE

Doorbell for Smart Homes

2N® IP Solo is a solution for a single family with higher demands on access control system. Not only is this intercom stylish, but apart from video calls on your smartphone it also offers advanced functionalities such as interconnection with smart home devices, motion detection for trespassers or integration with CCTV systems.

Accessory for the villa entrance

2N® IP Solo arrives in a single small package with all necessary accessories. Pick from wall-mounted or surface installation and colour of your preference. Ibutton is just enough for a single family.

All components and materials are industrial high-grade so as to ensure excellent performance under any conditions.

2N® IP Solo

WALL-MOUNTED

FLUSH-MOUNTED
2N® IP Base

**Designed for small scale installations**

2N® IP Base is a compact IP intercom with a simple and fast installation. It is fitted out with one or two buttons and brings high-quality audio and video. The intercom is designed especially for smaller scale installations.
IP ENVIRONMENT

2N® IP Base
KEY FEATURES

- Ready for outdoor challenges
- Wide-angle HD camera
- 10min installation
- RFID access control

RECOMMENDED USE

Door communication for small offices
The intercom will secure the entrance for any small office. Its HD camera with wide viewing angle let employees vet visitors or check the company’s surrounding in no time. A combination with an RFID card reader allows only the authorized people to get in. Despite its simplicity and easy mounting, it presents an efficient access control solution.

Entry level intercom for residential market
Easy installation using the quick mounting frame, high durability in outdoor and basic functionalities are key benefits of 2N® IP Base. 1 or 2 button are included in the basic package solving a problem of shared entrance for 2 families. Video calls with their visitors is a pleasant benefit.

- Depth: 8.99"
2N® IP Safety

A highly visible aid when you’re in distress

2N® IP Safety is a first-class security intercom designed for emergency communication. Whether drenched by rain or exposed to −40°C frost, it remains fully functional and allows you to reach for help at once. Moreover, its bright orange colour makes it easy to locate in a poor visibility.
IP ENVIRONMENT

2N® IP Safety
**KEY FEATURES**

- Robust metal body
- Fast help in case of emergency
- High intelligibility
- Automatic audio loop test

**RECOMMENDED USE**

<table>
<thead>
<tr>
<th>Safe city</th>
<th>Transportation</th>
<th>Industrial environment</th>
</tr>
</thead>
<tbody>
<tr>
<td>2N® IP Safety with its bright colour is a reliable emergency communicator that can be installed on custom posts within a city to provide safety to its inhabitants and tourists. Integrate it also with VMS and public address system. The external camera zooms the area and a speaker horn can immediately play a safety warning.</td>
<td>Accidents can easily happen on highways and therefore an emergency communicator must be in place. This is where 2N® IP Safety comes into its own. Due to its IP nature, remote control and a regular audio loop test, attendants in a dispatching centre always know that drivers on highways can reach out for help anytime.</td>
<td>In critical situations, 100% reliability and simple operation is a must. In case of an industrial incident, this IP intercom can halt the entire production line and simultaneously send an alert to a control centre. Using the stream from external cameras, it would be possible to manage the situation in no time.</td>
</tr>
</tbody>
</table>

MOUNTING IN PLASTERBOARD

WALL-MOUNTED
FLUSH-MOUNTED WITH BOX
2N® IP Uni

Great value for the money

2N® IP Uni is an intercom, which is very easy to install and is suitable for communication in general. A simple operation and connection with the IP world ensures that you won’t get lost on the premises. It can promptly connect you with a receptionist or a security guard and provide you a professional assistance.
IP ENVIRONMENT

2N® IP Uni
KEY FEATURES

- Stainless steel front plate
- Visual status signalling
- Built-in tamper switch
- Easy installation

RECOMMENDED USE

Public info point

Have you ever got lost in a large building like hospital, office building or in a foreign city, been looking for a landmark or need any other information? The 2N® IP Uni will help you. At the press of one button you connect with the information centre and the problem is soon resolved.

Info point for retail

It often happens that a customer needs help or advice about a particular product while shopping, or just wants some guidance around the department store they’re in. Thanks to the info point button, they are no longer kept waiting for a specific employee, but are immediately put through to the assistance desk.

2N® IP Uni

FLUSH-MOUNTED

MOUNTING IN PLASTERBOARD
2N® LTE Verso

World’s first LTE intercom

2N® LTE Verso combines minimum installation costs with a full-feature set. Using LTE technology means no other cable apart from a power supply is needed, with a benefit of all advanced functionalities such as a video communication. The main unit with HD camera can be accompanied by RFID, Bluetooth or biometrics supporting modules.
2N® LTE Verso
KEY FEATURES

- Ideal retrofit solution
- Secure configuration via cloud
- Pick any of the 14 modules available
- Effective upgrade to video intercom

RECOMMENDED USE

Upgrade to video intercom effectively

State protected historical buildings, older terraced houses, all these places might face a problem of installing a PoE cable to the entrance, especially if they already have a basic door station in place. Using LTE technology means no other cable apart from a power supply is needed, with a benefit of all advanced functionalities such as a video communication.

Communication for remote sites

Imagine a farm with a gate 3km far away. The only thing one has to do is to install 2N® LTE Verso, ensure its power supply and register it into My2N. The 2N® Mobile Video service then establishes a video communication with visitors via your smartphone leaving the installation costs at their minimum.

Create your own IP intercom

These OEM IP intercoms are intended for incorporation into a variety of devices. They are designed to add value of remote control, monitoring and either audio communication or video surveillance. Take an advantage of live support at a push of a button.
IP ENVIRONMENT

2N® IP Audio Kit
2N® IP Video Kit

KEY FEATURES

• VoIP solution you don’t have to develop
  These OEM IP intercoms are easily incorporated into your existing device. Thanks to IP technology you simply extend them to include IP audio, respectively IP audio and video functionality.

• Wide range of connectors
  Choose from a wide range of interfaces. Hook up a microphone, speakers, headphones or keypad buttons. Besides, 2N® IP Video Kit can be connected to two either PAL or NTSC composite video surveillance cameras.

• SIP support, with no server needed
  With it’s SIP protocol support the intercom easily links with IP phones and PBX from other producers, without having to connect to the server.

• Remote administration and control
  The HTTP API allows these OEM intercom systems to be easily integrated into the master system for remote administration. Alternatively, save time and money for onsite support thanks to our free service 2N® Remote Configuration. Access all your devices remotely via secured cloud connection.

• Adaptive volume
  Both the 2N® IP Audio Kit and 2N® Video Kit automatically adjusts speaker volume based on ambient noise level.
**Signalling protocol**

SiP 2.0 (UDP, TCP, TLS)

---

**Buttons / Keypad Interface**

Up to 16 separate buttons in 4x4 matrix

---

**Audio**

- **Microphone**: electret microphone, Max. Vpp = 100mV, Rin = 4.4kΩ, Vbias = 1.5V
- **Line input**: Max. 755mV RMS, Rin = 47kΩ
- **Amplifier**: 10W (class D), MONO output, THD < 1%, min. loudspeaker impedance: 4Ω
- **Line output**: Max. 755mV RMS, Rout = 600Ω
- **Full duplex**: Yes (AEC)
- **Protocols**: RTP/RTSP
- **Codecs**: G.711, G.722*, G.729*, L16/16kHz*

---

**Video**

- **Input count**: 2 (IN1, IN2)
- **Input format**: PAL or NTSC composite signal
- **Camera power supply**: 12V, max. 500mA (+12V, VGND)
- **Protocols**: RTP, RTSP, HTTP
- **Codecs**: H.263, H.263+, H.264, MPEG-4, M-JPEG
- **IP camera function**: ONVIF v2.4 profile S compatible

---

**Interface**

- **Power Supply**: 9 to 36 V ± 10 % / 2 A DC or PoE, typically 12 V DC
- **PoE**: 802.3af (Class 0 – up to 12.95W)
- **Power consumption**: 2W in idle state
- **LAN**: 10/100BASE-TX with Auto-MDIX, RJ-45
- **Recommended cabling**: Cat-5e or higher
- **Passive switch**: NO/NC relay contact; up to 30V / 1A DC or 125V / 0.3A AC
- **Active switch outputs**: 2 terminals (OUT1, OUT2); 7 to 11V DC depending on power supply (PoE: 10 V; adaptor: power supply voltage minus 2 V), max. 600mA
- **Logical inputs**: 2 galvanically isolated (IN1, IN2); Uin < 1.1V (L), Uin > 3V (H), max. Uin = 32V
- **LED control outputs**: 3 programmable terminals (LED1, LED2, LED3); up to 12V / 20mA
- **Supported protocols**: SIP 2.0, DHCP opt. 66, SMTP, 802.1x, RTP, RTSP, TFTP, HTTP, HTTPS, Syslog

---

**Mechanical Properties**

- **Working temperature**: −40°C – 55°C
- **Working relative humidity**: 10% – 95% (non-condensing)
- **Storing temperature**: −40°C – 70°C
- **Dimensions**: 142 x 98 x 34 mm – Part No. 9154100(C)
  138 x 90 x 26 mm – Part No. 9154101(C)
- **Weight**: Up to 280g – Part No. 9154100(C); Up to 150g – Part No. 9154101(C)
- **Protection class**: IP20 – Part No. 9154100(C), IP00 – Part No. 9154101(C)

2N Access Unit

Units with complete intelligence

The innovative 2N Access Units are based on IP technology and combine functions of a traditional controller and end access device simultaneously. The units are available with a touch keypad, fingerprint reader, RFID card reader or Bluetooth.
IP ENVIRONMENT

2N Access Unit
KEY FEATURES

• Controller and reader in one
• Single cable installation
• Weather-resistant units
• Luxury design unified with IP intercoms

RECOMMENDED USE

Villa secured by a fingerprint reader
The 2N® Access Unit Fingerprint Reader offers a perfect solution for a family house. Keep what’s the dearest to you under a maximum protection. The residents can rest assured they will never forget their identifier- a finger, because the weather-resistant access unit cannot be tricked, even by spoof fingerprints.

Enter your garage using Bluetooth
Install our app into your smartphone, leave the phone in your pocket and touch the 2N® Access Unit Bluetooth to have an access guaranteed. Due to programmable reading modes, you don’t even have to get out of your car when it’s raining to open your garage.

Communal spaces in apartment buildings
PIN codes are a reliable and convenient way of securing the premises. Protect belongings stored in communal parts of the apartment building by the 2N® Access Unit Touch Keypad and allow the access only to authorized persons with their own PIN code.

2N Access Unit

WALL-MOUNTED 1 MODULE

IN-WALL 1 MODULE
2N Access Unit 2.0

Multi-technology readers

The inbuilt multi-frequency readers of the access units allow a gradual employment of new secure 13.56MHz cards while continual use of the older unsecured ones. Except for the RFID technology, these units can be also equipped with a touch keypad for PIN entering or Bluetooth reader for access using the smartphone with mobile credentials.
2N Access Unit 2.0
KEY FEATURES

• Easily installed edge device
• Transition to secured cards
• Remote configuration and management
• Multi-factor authentication

RECOMMENDED USE

Highly protected areas
Users must prove their identity by swiping their RFID cards and using a PIN code to enter an area with a higher level of security such as a bank, lab or warehouse in a store. This can be easily done thanks to the 2N Access Unit 2.0 combining a card reader and keypad in one compact unit supporting a dual-factor authentication.

Office complex transitioning to secured cards
Majority of companies are still using the old, unsecured proximity technology that can be easily compromised. 2N Access Unit 2.0 is a multi-frequency reader supporting 125kHz as well as 13.56MHz credentials, which allows a transition to modern and secure access control in a very smooth way, minimizing one-off costs.

Convenient way of accessing a common space
In modern residential building, people use their mobile phone typically for home automation application such as heat and lights control or air condition. Now, these people can use the mobile phone also for the access control once they want to enter common areas. For the rest, there are traditional RFID cards.

EXAMPLE OF CONNECTION OF THE 2N ACCESS UNIT 2.0
## Technical parameters
### 2N Access Unit 2.0

### Audio
- **Speaker**: 0.8 W / 8 Ω

### Interfaces
- **Power supply**: 12 V ±15 % / 2 A DC or PoE
- **PoE**: PoE 802.3af (Class 0-12.95 W)
- **LAN**: 10/100BASE-TX with Auto-MDIX, RJ-45 modular jack
- **Recommended wiring**: Cat-5e or higher
- **Supported protocols**: DHCP opt. 66, SMTP, 802.1x, TFTP, HTTP, HTTPS, Syslog
- **Passive switch**: NO/NC contact, up to 30 V / 1 A AC/DC
- **Active switch output**: 8 to 12 V DC according to power supply (PoE: 10 V; adapter: power voltage minus 2 V), up to 400 mA
- **Inputs**: 2; can be used in passive or active mode (-30V to +30V DC)
- **Tamper switch is part of the 2N Access Unit 2.0**

### RFID card reader
- **Supported frequencies**: 125kHz and 13.56MHz
- **125 kHz**: EM4100, EM4102, HID Proximity
- **13.56 MHz**: ISO14443A, ISO14443B, ISO15693, NFC support
  - reads UID (CSN)
  - reads PACs ID (iCLASS SIO-enabled cards)

### Bluetooth
- **Version**: Compatible with Bluetooth 4.0 or higher (BLE)
- **RX sensitivity**: Up to -93 dBm
- **Range**: Adjustable (short ~ 0.5m, middle ~ 2m, long ~ up to 10 m)
- **Security**: RSA-1024 and AES-128 encryption
- **Mobile applications**: 2N® Mobile Key (Android 5.0 and higher, iOS 11.0 and higher)

### Touch Keypad
- **Technology**: Capacitive (0.1pF sensitivity)
- **Calibration**: SmartSence (regular automatic calibration)
- **Signalization**: Acoustic and multi-coloured LED

2N Access Unit M

Access control readers in mullion design

Very narrow design makes these readers ideal for installation on a door frame or to places where there is not enough space, regardless whether it is a brick wall, glass or metal surface. The hardened glass on the front of the unit looks not only elegant but also guarantees resistance to scratches.
IP ENVIRONMENT

2N Access Unit M
KEY FEATURES

• Based purely on IP technology
• Mullion style mounting
• Multi-technology readers
• Remote configuration and management

RECOMMENDED USE

High level of protection for server room
All servers with sensitive data deserve real protection – cybersecurity as well as physical security. Let the employees identify themselves by an RFID card, PIN code or both. The only thing needed is then the 2N® Access Unit M Touch Keypad & RFID.

Meeting rooms under the control
A project with glazed meeting rooms and access only for authorized employees has a simple solution. 2N Access Unit M can be easily installed on glass surface or metal door frame and allows access in traditional manner, via RFID cards, as well as the trendy way using a smartphone with Bluetooth. Each employee can pick what suit them better.

Most common access control for office buildings
There are many rooms and places inside an office building that need to be protected. RFID cards are often connected to an attendance system, which makes them the most widespread method of employees identification. Besides, the multi-frequency 2N® Access Unit M RFID can also be used as T&A terminal and send the date to 2N® Access Commander.

2N Access Unit M

WALL-MOUNTED

IN-WALL
2N® Access Commander

Software for access control and bulk management

2N® Access Commander, a nerve centre of the whole 2N IP access control system, has a simple and intuitive user interface. Use it not only for managing access to the building, but also for time and attendance tracking, visitor management or for monitoring the status of connected access control devices in real time.
2N® Access Commander

KEY FEATURES

• **Software for access control and bulk management**
  With this Access Control system you can bulk manage all 2N Intercoms and access units made by 2N, which you will appreciate especially when it comes to larger installations.

• **Device monitoring and notification**
  Monitor key parameters of 2N devices in real time. Providing there is an obstruction, 2N® Access Commander sends the admin an email notification with the device’s name and the issue.

• **Easy to install solution**
  2N® Access Commander can be got up and running easily by people without any installation experience. All without even having to go through intensive training or to pore over cryptic manuals.

• **Visitor management**
  Fully solved visitor management ensures that the system can be comfortably used by the receptionist. She can quickly add the visitor to the system (Access Commander) with all important information, e.g. visitor’s name, reason of the visit, time validation of the card, group assignment.

• **Multiple site control**
  Multiple sites control from a single location is a huge benefit for companies having branch offices in different locations that are interconnected via VPN. Admin sits in one city and oversees the access control system in other cities through the LAN. With serial cable systems it would be impossible.

• **Open for integration**
  The Access Control system integrates easily into third-party systems such as Time & Attendance or CRM using the REST API web interface.
**Technical Parameters**

### General

2N® Access Commander is delivered either pre-installed on mini-PC, or in the .OVA format intended for importing into the Oracle VM VirtualBox or VMware (version 5) virtual systems.

### Minimum HW requirements for the PC/server

<table>

### Communication security

- https protocol

### Supported browsers

- Optimised for the browser: Google Chrome (version 40 or higher)
- Other supported browsers are: Mozilla Firefox (version 35 or higher), Internet Explorer (version 11 or higher)

### Number of log events

- 2N® Access Unit and 2N IP intercom: up to 10 000 events in RAM memory
- 2N® Access Commander: unlimited

### 2N® Access Commander Box

- Ultra compact PC design (56.1 x 107.6 x 114.4mm)
- Intel® Celeron® Processor J3160 – 4 cores
- 2.5" SSD SATA III Hard Drive - 32GB
- DDR3 SODIMM memory – 4GB
- Gigabit LAN port for Ethernet connection

2N® Access Commander Box is intended and optimized for SME installations (80 devices, 1000 users)

2N® Indoor Touch 2.0

Luxury designed for your interior

The stylish multifunctional communicator 2N® Indoor Touch 2.0 fits elegantly into any interior. One glance at the display panel will let you know who is standing outside your door, start a dialogue or open the door lock.
IP ENVIRONMENT

2N® Indoor Touch 2.0
KEY FEATURES

- See what’s happening outside your door
- Easy integration with home automation systems
- 4mm glass with capacitive touch
- Long-lasting luxury

red dot design award
winner 2017

RECOMMENDED USE

Home entrance monitoring

Keep track of what is happening outside your front door. Thanks to the 2N® Indoor Touch 2.0 you can comfortably communicate with your visitor via the 2N Intercom installed at your door. With its non-stop video monitoring of your building entrance you are always an attentive host to your guests.

Integration into home automation systems

The 2N® Indoor Touch 2.0 allows easy control of home automation systems. The answering unit is supplied with a preinstalled licence for the installation of third-party applications for Android. You will thus have air-conditioning, lights, music playback and even visitors at your door under your complete control.

2N® Indoor Touch 2.0

WALL-MOUNTED
The 2N® Indoor Compact is an indoor answering unit designed especially for the residential market. Installation by connecting a single UTP cable and configuration via a web interface guarantees that integrators can put the unit into operation quickly and easily. Users will be impressed by the minimalist design, tempered glass surface, 4.3” colour display and intuitive controls.
Friday, June 18

14:15
2N® Indoor Compact
KEY FEATURES

- Intuitive controls, even for inexperienced users
- Designer surface made of tempered glass
- Configuration via a web interface
- HD quality sound with noise suppression

RECOMMENDED USE

**Video door communication for an apartment**

As soon as a visitor rings the bell at the front door, the call can be accepted in the living room or kitchen with a single touch of the button and just as easily can be opened the door. In case the resident is not at home, a call log with snapshots is saved in the unit.

**Video from internal and external cameras**

When accepting a call on the 2N® Indoor Compact, it is possible to switch from the intercom’s camera to video from an external IP camera by the entrance. Make sure that only the person you want to let in enters the building.

2N® Indoor Talk

Answering unit with HD sound

The 2N® Indoor Talk answering unit will suit every flat or home. The aesthetic appearance of this product was achieved by using a glass surface and striking backlighting of its icons. However, an emphasis was placed on selecting the highest-quality audio components in order to achieve a high-quality sound.
IP ENVIRONMENT

2N® Indoor Talk
KEY FEATURES

• Luxury design and materials
• Modification to your requirements
• Precision installation box
• HD quality sound with high volume

RECOMMENDED USE

Intuitive unit for the whole family

Due to its simple design, the operation of 2N® Indoor Talk can quickly master anyone, no matter the age. Have the option to set the required intensity of icon backlighting, choose from the 10 available ringtones or set the unit to “Do not disturb” mode.

Complementary answering unit

Having basic functionalities, 2N® Indoor Talk can serve as an additional unit to the main video answering unit. The 2N® Indoor Talk allows making calls to not only a 2N IP intercom, but to other corresponding answering units at home, or on the reception of the apartment building.

FLUSH-MOUNTED
2N® Mobile Video

See who’s ringing at your door

Stay informed about everything happening outside your entrance. The 2N® Mobile Video service lets you communicate with your visitors via your mobile phone and the 2N Intercom installed at your door.
2N® Mobile Video

KEY FEATURES

• See who’s ringing at your door
  Receive video calls from the 2N intercom on your smartphone over the internet using the 2N® Mobile Video application or just check the camera of your intercom to see what is happening at your front door.

• Open the door remotely with one touch
  Open the door for your visitors with a single press of a button on your smartphone. The application is easily accessible on your mobile device or tablet with the iOS or Android operating system.

• Tailored for multi-tentant building needs
  Integrate intercom with your home automation system to control lights, alarm or start a any custom action using 2N® Mobile Video app. In combination with the 2N intercom that can call to more flats via IP, a tenant can accept a call even when they are not at home.
### Technical Parameters

**General**

2N® Mobile Video is a cloud service located on the My2N portal. You need to create an account at www.my2n.com to activate this service.

At least one 2N IP intercom with a camera and firmware version 2.25 or newer connected to the internet.

A mobile phone with the Android operating system version 4.4 or newer or iOS version 10.x or newer, and the 2N® Mobile Video application installed.

The mobile phone must be connected to the internet via Wi-Fi or a 3G or 4G mobile data connection. (The service may not function correctly with slower mobile data connections.)

**Supported browsers**

2N Cloud Services
IP ENVIRONMENT

2N® Remote Configuration

KEY FEATURES

• **Save on travel costs**
  Technicians no longer need to come to you when changes in product configuration are required. Saving both time and costs, all that’s required is a computer with internet access.

• **Offer instant help**
  Your device may be connected over the internet from anywhere with a web browser. You no longer need to wait for a technician to arrive.

• **No network setup needed**
  2N® Remote Configuration works with most of the network setups without any additional configuration necessary.

• **Comfortable access**
  Adding a device to the service and subsequent activation is very simple. Your 2N device is then configured through its regular web interface.

• **Secure connection**
  The remote setup of 2N products using the 2N® Remote Configuration service is entirely safe, thanks to double encrypted communication.
IP ENVIRONMENT

2N® Partner API

KEY FEATURES

• Offer your own branded solution
  Use 2N services that allow you to receive video calls on a mobile phone,
  open the door via Bluetooth or remotely configure products in your own
  software and mobile application, all under your own brand.

• Manage 2N devices online
  Use the 2N® Partner API to easily configure 2N devices directly from your
  own facility management software, CRM or other systems.
  All you need are the devices to be connected to the internet.

• Robust and secure REST API
  The 2N® Partner API meets the strictest criteria in the field of cybersecurity.
  Apart from encrypted communication, it also boasts a detailed description,
  which will certainly be appreciated by your developers during integration.

• Video calls from an intercom to your mobile phone
  Do you lack the option of receiving video calls from an IP intercom in your
  home automation application? Thanks to the 2N® Partner API,
  with our complete API documentation, you can link it to the
  2N® Mobile Video service.

• Access using a mobile phone
  Provide your users with the option of opening the door to their house
  via your mobile application. Generate a user Bluetooth ID for them
  in your system and download it to the 2N IP access control unit
  via the 2N® Partner API.

2N® SIP Speaker Horn

Loudest sound on the market

2N® SIP Speaker Horn is an outdoor speaker with exceptionally loud and clear sound. Use the speaker as a practical tool for broadcasting live announcements across large areas and actively protect your property.
IP ENVIRONMENT

2N® SIP Speaker Horn
KEY FEATURES

- Automatic noise detection
- Highest SPL on the market
- ONVIF for integration with VMS
- Built-in audio self-diagnostics

RECOMMENDED USE

<table>
<thead>
<tr>
<th>Warning for unwelcomed visitors</th>
<th>Public address in town</th>
<th>Assembly line emergency communication</th>
</tr>
</thead>
<tbody>
<tr>
<td>If an unwelcome visitor enters your premises, you can respond immediately with a live or preset announcement to promptly deter the trespasser. Especially, when in integration with VMS, the intruder can be addressed specifically by using visual information.</td>
<td>Public announcements have to be loud enough to be heard through closed windows to catch an attention of town residents. Replacing an old analogue solution, 2N® SIP Speaker Horn allows authorized town representatives to make announcements even via their mobile phones.</td>
<td>Working in a noisy environment, such as an assembly line, requires wearing earplugs. However, in case of emergency an announcement, let alone an evacuation notice, must be clearly audible despite the earplugs. 2N® SIP Speaker Horn, the loudest speaker on the market, is indeed the best solution.</td>
</tr>

2N® SIP Speaker

Live and pre-recorded announcements

Take advantage of the 2N® SIP Speaker for playback of live or pre-recorded announcements. This enduring speaker offers a fully-featured audio system with SIP protocol support. What’s more, it doesn’t need any additional HW or SW investment, e.g. a computer with supporting applications.
IP ENVIRONMENT

2N® SIP Speaker
KEY FEATURES

- A wide range of connectors
- Active IP loudspeaker with PoE support
- Possibility to connect 2nd passive speaker
- Simple integration into VMS systems for voice reaction

RECOMMENDED USE

School classroom

2N® SIP Speaker meets the requirements of every School Classroom, where the students and teachers need to be informed about every lesson start/end by a school bell or by a sound of their own choice. Also the Headmaster’s directions and information will be distributed throughout the schools LAN to every Classroom equipped with 2N® SIP Speakers.

Warehouses, waiting rooms, remote sites

In warehouses or waiting rooms there is a need to make loud announcements—typically to report a new order or call another patient. Remote sites, although being monitored, face unwelcome. Experience has shown that in such a case, a verbal warning is very effective. 2N® SIP Speaker allows remote announcements to be made to any places with a data network.

2N® SIP Mic

Server-less paging to up to 12 zones

A SIP based microphone console for paging can appeal not only by wooden designer case, but also by various advanced functions such as broadcasting to 12 zones, two-way communication thanks to an inbuilt speaker, or playing back pre-recorded messages.
IP ENVIRONMENT

2N® SIP Mic
KEY FEATURES

- Sever-less paging
- Hands-free mode for making voice calls
- Pre-recorded announcements
- Paging to Axis IP Speaker over Axis VAPIX®

RECOMMENDED USE

Public address in schools

Broadcast announcements into as many as 12 zones without having to install a server. A headmaster can broadcast specific messages into individual classrooms or to the entire school. Besides, at simple press of a button one can also listen to what is happening in certain areas.

Paging console for supervisory workplaces

Security officers responsible for camera-guarded premises need an effective tool to eliminate property losses in case of intrusion. Thanks to the 2N® SIP Mic IP console, they can report to the disturbed part of the object and inform/ expel/ intimidate the perpetrator with a live message. This method is much more effective than just a siren or a pre-recorded general announcement.

- **2 × 1.5 mm**

- **2N® SIP Mic**: 2 × 0.8 mm
- *Optional*: 2 × 1.5 mm
- **UTP Cat. 5**: 12V DC/2 A adapter

- **2N® SIP Audio Converter**: 2 × 0.8 mm
- *Optional*: 2 × 1.5 mm
- **UTP Cat. 5**
- **12V DC/2 A adapter**

- **Speakers**: 2 × 1.5 mm
- *Optional*: 2 × 1.5 mm
2N® SIP Audio Converter

Upgrade for analog paging

Connect your Public Address to your telephone system and use it to make announcements via your mobile phone. 2N® SIP Audio Converter converts the sound from a SIP phone system to the classic analogue form so you can broadcast live or pre-recorded messages over the IP network to any distance.
IP ENVIRONMENT

2N® SIP Audio Converter
KEY FEATURES

- Makes public address system from any IP telephony system
- Two-way communication
- Upgrade of an analog PA system to flexible IP PA system
- Web interface configuration

RECOMMENDED USE

Doctor’s waiting room

2N® SIP Audio Convertor lets you make live or pre-recorded messages from an IP connected telephone. Thanks to relay output of the 2N® SIP Audio Converter, it is possible during live paging to turn on a light sign such as „Next one, please”, what may help patients with hearing disabilities.

Two-way communication at schools

An integration of the 2N® SIP Audio Convertor with a SIP Speaker and a IP microphone allows teachers to get easily hold of a janitor for a maintenance and service purposes. There is no more a need to leave a classroom when a projector doesn’t work. Also, the janitor can easily verify whether everyone left the premises after school thanks to the listen-in function. Both functionalities are particularly useful in case of escalated situation as well.
